

Lab Proficiency Reporting from Instrument Manager

Seamlessly transmit Proficiency Test
results to API

Your lab faces constant resource pressure and demands to do more with less. Squandering time on error-prone, manual tasks only place extra burden on lab staff. The impact is significant. According to The CAP, approximately 40% of Proficiency Testing (PT) errors are clerical, caused by a manual data entry mistake.

More than ever labs need solutions to optimize, automate, and execute lower value work so lab experts can focus on more profitable, productive, patient-centric activities.

Lab Proficiency Reporting from Instrument Manager helps automate Proficiency Test reporting, saving labs time and money.

Why Lab Proficiency Reporting?

Minimize PT reporting error risk

Focus on profitable, productive,
patient-centric activities

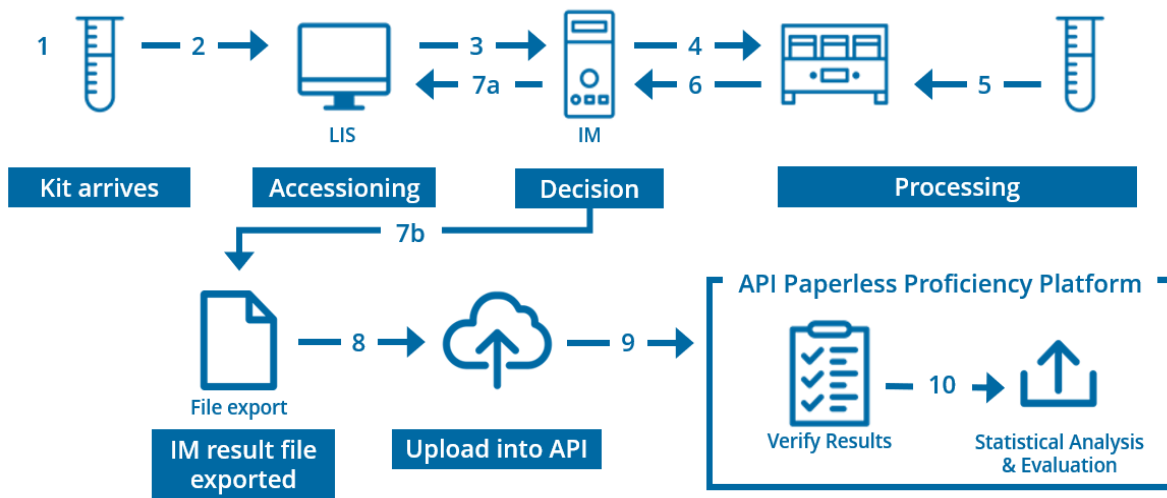

Seamlessly transmit PT
results to API

Simple, streamlined Proficiency Test Reporting

Lab Proficiency Reporting from Instrument Manager (IM) helps automate PT result delivery so you can eliminate manual work, increase accuracy, and reduce QC costs - all while protecting your lab's reputation.

- **Reduce Proficiency Test failures:** Lab Proficiency Reporting puts a stop to manual result entry, eliminating the risk of errors that result from manual transcription
- **Saves time and money:** Simply eliminating the burden of manual PT result reporting allows lab staff to focus on more profitable and productive services. In fact, labs have shown a \$35K annual savings in labor cost* with Lab Proficiency Reporting
- **Integrate with API:** Lab Proficiency Reporting from IM works using integration drivers developed specifically to support API's Paperless Proficiency Testing
